

Personal Website!

Sean Park
15-112 Special Lecture

Hi! I'm Sean.

- <http://seanpark.xyz>

Set Up

- Create an account on github.com
- Download the GitHub CLI:
 - Mac: <http://git-scm.com/download/mac>
 - Windows: <https://git-scm.com/download/win>

Get started on GitHub!

- Verify email
- Click 'Start a Project'
- Name project: <username>.github.io
- Create repository

Check out the template!

- Download my website template from seanpark.xyz/yolo
- Unzip the file to your Desktop
- Rename the folder to “myWebsite”

Hi! I'm Sean.

This is an introduction of who I am. This is an introduction of who I am.

This is an introduction of who I am. This is an introduction of who I am.

This is an introduction of who I am. This is an introduction of who I am.

This is an introduction of who I am. This is an introduction of who I am.

This is an introduction of who I am. This is an introduction of who I am.

Check out my [resume](#) here!

Make it your own!

- Replace my photo with your own! Call it photo.jpg
- Replace my icon with your own! Call it icon.png
- Replace my resume with your own! Call it resume.pdf
- Replace all the text in whatever way you want!

Let's get it online

- Open terminal
- `cd ~/Desktop/myWebsite`
- `git init`
- `git add .`
- `git commit -m "my first commit"`
- `git remote add origin https://github.com/<github username>/<github username>.github.io`
- `git push origin master`

- Go to <github username>.github.io to check out your new website!
- Experiment with different tags to customize your website further.
